

The change not seen.
**FOR THE RIGHTS AND FREEDOM OF MOVEMENT
OF MIGRANTS.**

With the new government we were told that everything would change because the racists of the LEGA and the former Minister Salvini had no longer the power to close the ports and feed a climate of hatred towards migrants. What we see instead are the thousands of asylum seekers who are denied basic rights by territorial commissions, prefettura, questura. **We see they do not want to abolish the Security Decrees**, voted by the previous Government, real examples of an institutional racism that wants to prevent any form of rights and dignity of the migrants.

Instead, the structures and paths of hospitality are abolished. But above all they do not want to abolish, or even change, the Bossi-Fini law, the main instrument of exploitation, clandestinity and expulsion of hundreds of thousands of migrant women and men. In all this we see no change. **There is no mention of regular entry channels for migrants**. Migrants continue to be discriminated on the basis of a racist division between asylum seekers and economic migrants. The issue of residence permits continues to be obstructed by the long time bureaucracy that acts based on political indications.

It is time to say no to discrimination, exploitation, illegal immigration, expulsions. Without freedom of movement, without the speech of the migrants there are no rights. **The protagonism and the struggle of the migrants is the true discontinuity**. The rights are obtained by the direct initiative of the migrants. To meet, to get to know each other, to address these problems, we opened a front office every Wednesday from 5 to 7 pm in Via delle Battaglie 33 / b. We think it's an important opportunity for a real change.
